

IR Activities / Events

Earnings Results Briefing

We hold earnings results briefings for institutional investors twice a year. During FY2017, results briefings were held in May and November. In addition to presentations from the President and the Director in charge of Management Strategy, the CTO also gave a presentation on technology developments.

Meetings with Institutional Investors

We proactively respond to individual meeting requests from securities analysts and institutional investors and hold discussions that help promote understanding and appropriate valuations of our company. In FY2017, we held over 140 meetings and telephone conference calls.

Conference Exhibits

Nippon Chemi-Con had booths at the following conferences in FY2017 (excerpt of major conferences only).

These conferences provided us with opportunities to interact and communicate with customers, agents and distributors, business partners (suppliers), institutional and individual investors, students involved in the recruitment process, and families with their children.
